I

k. This application has been accepted for filing and is now ready for environmental analysis.

l. The existing Black Canyon Bliss Hydro Project consists of: (1) a 735-foot-long, 18-inch-diameter underground concrete intake; (2) a concrete transition box; (3) a 303-foot-long, 18-inch-diameter above ground steel penstock; (4) a powerhouse containing a single generating unit with a rated capacity of 24 kW; (5) a 20-foot-long tailrace, (6) a 530-foot-long, 34.5 kV transmission line; and (7) appurtenant facilities. The project generates an annual average of 155 kilowatt-hours.

m. Due to the small size and location of this project, the applicant's close coordination with federal and state agencies during preparation of the application, and studies completed during pre-filing consultation, we intend to waive scoping and expedite the licensing process. Based on a review of the application and resource agency consultation letters filed to date, Commission staff does not anticipate that any new issues would be identified through additional scoping. Based on the issues identified during the pre-filing period, staff's National Environmental Policy Act (NEPA) document will consider the potential effects of project construction and operation on geology and soils, aquatic, terrestrial, threatened and endangered species, recreation, and cultural and historic resources.

n. A copy of the application can be viewed on the Commission's website at <http://www.ferc.gov> using the "eLibrary" link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, contact FERC Online Support.
